cmeregistration.ucalgary.ca

PAPERLESS CONFERENCE
Access to journal articles will be made available online at the beginning of each journal article conference

Check the website for any program updates
cumming.ucalgary.ca/cme/courses

COURSE OVERVIEW

The Psychiatry Online Literature Review Course provides the opportunity for physicians and residents to discuss current relevant journal articles and their relation to practice. The focus of the articles will be "Highlights of 2018". All discussions are held online in an asynchronous format so that participants can post their comments at any time.

Convenient method for physicians and residents to review journal articles, and their relation to practice with other physicians and residents, from the familiarity of their own office or home computer.

COURSE OBJECTIVES

This course uses distance education (DE) technology to provide continuing medical education opportunities to physicians and residents who have distance and time constraints. Topics will be selected in accordance with the priority learning needs of the participants. The intent of the course is for learners to:

- discuss journal articles, related clinical practice and application of new knowledge to practice
- refine journal article critical appraisal skills
- develop an interactive online learning community of physicians and residents
- provide a venue for physicians and residents to interact with online learning resources and engage in personal learning

WHO SHOULD ATTEND

Psychiatrists, Family Physicians and Residents

CREDITS

MOC Section 1 - up to 38.0 hours

Participants will receive 2 Section 1 CPD credit hours for the introductory conference and 3 Section 1 CPD credit hours for each online article discussion forum in which they participate.

MOC Section 3 Self-Assessment - up to 3.0 hours

PROGRAM DETAILS

- This online literature review course is run using a collegial journal club format
- The course consists of an initial Introductory Conference and is followed by three consecutive online Journal Article Conferences for the discussion of journal articles
- The Introductory Conference will be open for one week; however, the introductory conference site will remain open throughout the year for new and established participants to introduce themselves
- Each Journal Article Conference runs for a 5 week period and each has up to four articles covering different topics; you can join any or all of them
- Each journal article discussion will also include a short knowledge assessment (Section 3)

What Will Be Covered

General psychiatry, psychotherapy, child and adolescent psychiatry, perinatal psychiatry and geriatric psychiatry are usually covered. Other topics and articles are chosen based on the suggestions and needs assessments of registered participants. Participants will be able to access and download the articles studied online. Staff from the Department of Psychiatry, University of Calgary, will facilitate each online discussion.

Course Delivery

The Psychiatry Online Literature Review Course is delivered using the web-based discussion forum on the University of Calgary's Desire 2 Learn (D2L) learning management system. Participants require access to a computer with an internet connection. D2L access is password controlled and all discussions are kept strictly confidential. A D2L manual will be provided and the introductory conference will be used for participants to familiarize themselves with the use of the system.

Prerequisite Computer Skills

Basic knowledge of email, word processing and finding sites on the internet is recommended to manage the technical aspects of the course.

Time Commitment

Four discussion forums are held during each conference, and each conference runs for 5 weeks. Participants can log-on to post comments at anytime from anywhere when it is most convenient to read the comments of others and to post contributions to the discussion. To get maximum benefit from the discussion forums, active participation (e.g. logging-on about twice a week) is recommended to ensure sufficiently in-depth discussion develops. HOWEVER, a minimum of two postings in the 5 week discussion period are required to receive credit for that discussion forum.

COURSE PROGRAM

February 4 to May 26, 2019

INTRODUCTORY CONFERENCE

February 4 to February 10, 2019
1 WEEK

FIRST JOURNAL ARTICLE CONFERENCE

February 11 to March 17, 2019
